

From Financial Risk to Economic Risk

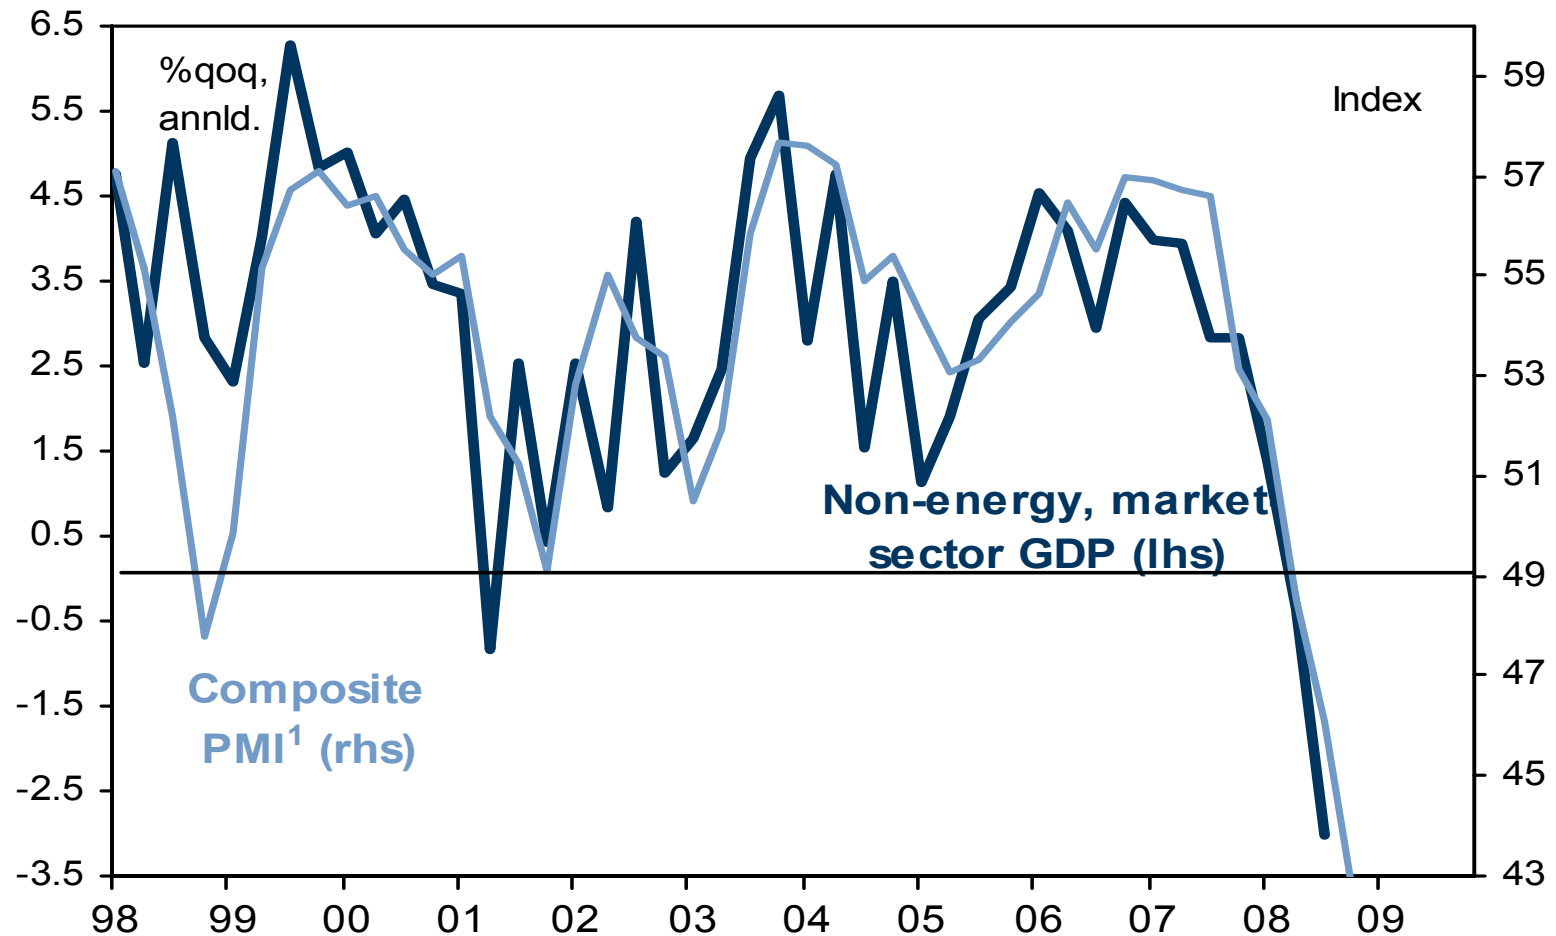

Kevin Daly
Executive Director
Goldman Sachs
17 November 2008

Summary

- **The near-term outlook is unambiguously bleak...**
- The UK and Eurozone economies have fallen sharply into recession. We expect a full-year contraction next year of 0.4% in the UK and 0.3% in the Eurozone.
- Monetary policy requires a sharp adjustment. We expect the MPC to cut rates to 1.5% and the ECB to cut rates to 2%.
- **Yet, amidst the gloom, there are some silver linings...**
- Monetary policy is responding and the trends in energy, food and mortgage costs are being reversed.

UK: Private sector contracted by 0.8% in Q3

Some silver linings amidst the gloom

1. Monetary policy is endogenous – interest rates can and are falling in response to the weakness.
2. A UK-specific positive: Financial conditions have already eased sharply on the back of a 25% fall in Sterling's trade-weighted exchange rate.
3. The reversal of the trends in energy, food and mortgage costs, together with a lower tax burden will add more than 3% to real household incomes in 2009.
4. The rate of European (even UK) mortgage write-offs is likely to rise by much less than the market is discounting.

Still some way from the early 1990s

UK write-offs much lower than the US

Repossessions likely to peak below 1990s level
